

GIRARD

Introducing Girard Tankflo
The New Gold Standard

Features:

A unique "spring/cam" cylinder is guaranteed for life (GFL™). Simply stated, if you break it, we will send you a new one free of charge.

A completely unrestricted 3" flow path with "zero retain" discharge arrangement.

Built-in Butterfly Valve with a cleaning position that exposes both sides of valve disc.

Seal and O-Rings are made from PTFE and perfluoroelastomeric material.

Benefits:

Never pay for repair parts again.

Reduces discharge time by more than 30%. "Product traps" have been eliminated making it easier to clean.

Intermediate gaskets are eliminated. Cleaned and repaired in place. Repair parts are interchangeable with other manufacturers parts.

Sealing Technology matched with the widest range of industrial chemicals transported in ISO tank containers. The main PTFE Seal is interchangeable with the Girard Megaflo pressure/vacuum relief vent pressure seal.

**Reliability
Performance
Trust**
