

Purity & Security

The Girard Sani-Vent gives you peace of mind when transporting food grade products in sanitary tank trailers. This highly durable, low-maintenance valve is made from 316L stainless steel, is polished for ease of cleaning in place and can be completely disassembled without the need for hand tools. The Sani-Vent is tamper-resistant with provisions for tamper-evident cargo seals that prevent unauthorized access, ensuring your cargo is safe and secure.

The Sani-Vent is successfully in use on all types of containers transporting liquid food grade products. New users are impressed with the neat design and clean operation. Seasoned Sani-Vent customers have long forgotten the leakage problems they faced with the other brand of tank vent available, and now turn to Girard for their dedicated products and dedicated service.
