

VAPOR RECOVERY ADAPTERS

Built for the Long Haul

- Adapter can be cleaned and repaired in place without needing to disassemble the tanks pipe work.
- Unit opens prior to the chemical hydraulic valve and closes only after the hydraulic valve is closed.
- Electropolished surfaces both inside and out allows for complete and expeditious cleaning.
- Follows the TTMA's recommended guidelines for Vapor Recovery Devices.
- Hydraulic Cylinder is completely isolated from the tanks liquid contents.
- Provides positive visual confirmation when valve is open or closed.
- Can be fitted with either visual or audible alert sensors to indicate when valve is open.
- Doubles as an air-unloading device.

Designed and built by Girard Equipment with input from the most forward thinking people in the Tank Trailer Industry. Girard's Vapor Recovery Adapters are completely reliable and user friendly, making it a sound investment choice for the life of your trailer.
